SPECIAL ISSUES:
Special Issue on COVID-19

Pharmaceutical Sciences and Research (PSR) is an official scientific journal managed by Faculty of Pharmacy Universitas Indonesia. PSR was first published in 2004 under the name of **Majalah Ilmu Kefarmasian (MIK)**. After a year of transition, MIK was then reestablished under a new editorial with a new vision to become an internationally accredited journal. Starting in 2014, MIK was transformed into Pharmaceutical Sciences and Research.

Pharmaceutical Sciences and Research is published three times annually. PSR aims to publish a complete and reliable source of information on the **drug discoveries** and current developments in the field related to **natural products**, with a strong emphasis on originality and scientific quality. We also consider other areas related to **pharmaceutical sciences and practices**.

All submitted manuscripts are subjected to **double-blind peer review** and editorial review processes before being granted acceptance. Starting from February 2019, we only receive **manuscript in English**.
