The following message is being delivered on behalf of IAES International Journal of Artificial Intelligence (IJ-AI).

_____
-- IJ-AI for writing format and style: https://iaescore.com/gfa/ijai.docx
-- Similarity score of your manuscript must be less than 20%

Dear Prof/Dr/Mr/Mrs. Dr SINTHA WAHJUSAPUTRI,

Thank you for submitting the manuscript, "Artificial Intelligence-Based Learning Model to Improve the Talents of Higher Education Students Towards the Digitalization Era" to IAES International Journal of Artificial Intelligence (IJ-AI), ISSN/e-ISSN 2089-4872/2252-8938. This journal is indexed in Scopus (https://www.scopus.com/sourceid/21100901206) and all published papers since the 2018 issues have been included in scopus.com. This journal has been included in the SCImago Journal Rank (https://www.scimagojr.com/journalsearch.php?q=21100901206&tip=sid&clean=0) since 2020 (or since SJR 2019). The IAES International Journal of Artificial Intelligence (IJ-AI) has an SJR of 0.402 (Q2), SNIP of 0.845, and a CiteScore of 3.4. With the online journal management system that we are using, you will be able to track its progress through the editorial process by logging in to the journal web site:

Manuscript URL:
https://ijai.iaescore.com/index.php/IJAI/author/submission/23842 <-- It is
your paper ID
Username: sintha_89

Before continuing for review process and for avoiding delay on review
process, please re-upload your updated paper as "author version" in the same
paper ID number within 10 days.
Attention Please!
1. Please try to adhere to the format as closely as possible. Please
carefully read our most recent manuscript submission guidelines
(https://iaescore.com/gfa/ijai.docx).
2. Add the names of all authors, and please provide active or valid emails,
as well as author identifiers and academic social network profiles, such as
Google Scholar, ORCID, Scopus, and Web of Science ResearcherID (formerly
Publons). You can also add your Academia.edu, ResearchGate, LinkedIn, Loop,
and other profiles.
3. A high quality paper should has:
    a) a clear statement of the problem the paper is addressing;
    b) the proposed solution(s); and
    c) results achieved. It describes clearly what has been done before on
the problem, and what is new. Please clearly state the three points listed
above in your updated paper.
4. The number of minimum references for an original research paper is 25

4. The number of minimum references for an original research paper is 25
(and at least 20 recently journal articles); and the number of minimum
references for a review paper is 50 (and at least 40 recently journal
articles).

At this stage, it is critical that you adhere to every detail of the IAES
format. Otherwise, we will reject your paper.

When contacting us, please always include your paper ID number in the
subject line of your email.

Thank you for considering this journal as a venue for your work.

Best Regards,
Prof. Dr. Eugene Yu-Dong Zhang
IAES International Journal of Artificial Intelligence (IJ-AI)

NOTE: A single author is NOT preferred in this journal, except come from
qualified researcher (min WoS/Scopus h-index: 15). We would like to publish
high quality papers of a research group. Paper with single author normally
will be REJECTED.

  ::: Checklist for updating your paper for review :::
  ----

  1). For research paper, It is mandatory to present your final paper
  according to the "IMRADC style" format, i.e.:
      1. INTRODUCTION
      2. The Proposed Method/Algorithm/Procedure specifically designed
  (optional)
      3. METHOD
      4. RESULTS AND DISCUSSION
      5. CONCLUSION
      See http://iaescore.com/gfa/ijai.docx

  Introduction section explains the context of the study and states the
  precise objective, and was presented within 3-8 paragraphs. Suggested
  structure of an introduction section is:
    a). Introductory paragraph (usually one or two paragraphs):
        - Give a general introduction to the topic for a broad audience
        - Narrow the focus to your particular topic
        - State your research problem and aims
    b). Literature review (usually several paragraphs):
        - Summarize the relevant literature on your topic
        - Describe the current state of the art
        - Note any gaps in the literature that your study will address
    c). Research targets (usually one paragraph):

c). Research targets (usually one paragraph):
  - Briefly describe how you will accomplish your aims
  - Give a preview and state the contribution of the work

Method section- The experimental/method section is a straightforward description of what you did in your research and how you did it, clear and detailed at every stage. A detailed method section will make your article reproducible by other researchers, allowing them to trust and build on your work.
- A detailed explanation of all methodologies, instruments, materials, procedures, measurements, and other variables used in the investigation.
- A thorough description of the data analysis and decisions for excluding some data and including others.

Results and discussion section: The manner of the results presentation should be clear and uncomplicated. This section summarizes the most relevant findings, providing statistical analysis results as appropriate and comparisons to other study findings. Figure results should not be repeated in tables. This is the section in which the author(s) should explain in detail what he/she/they uncovered throughout their investigation. It should be well-organized and in a logical order. This section should be supported by appropriate references.

If you have updated version, please submit it using the same paper ID number as the author version through our online system.

2). Please ensure that all references have been cited in your text. Use a tool such as EndNote, Mendeley, or Zotero for reference management and formatting, and choose IEEE style. Each citation should be written in the order of appearance in the text in square brackets. For example, the first citation [1], the second citation [2], and the third and fourth citations [3], [4]. When citing multiple sources at once, the preferred method is to list each number separately, in its own brackets, using a comma or dash between numbers, as such: [1], [3], [5]. It is not necessary to mention an author's name, pages used, or date of publication in the in-text citation. Instead, refer to the source with a number in a square bracket, e.g. [9], that will then correspond to the full citation in your reference list.
Examples of in-text citations:
   This theory was first put forward in 1970 [9].
   Zadeh [10] has argued that ...
   Several recent studies [7], [9], [11]–[15] have suggested that....
   ... end of the line for my research [16].
We usually expect a minimum of 2n+9 references (for original research papers) and 4n+18 (for review/survey papers) primarily to journal articles, where n = page length of your papers (in simple words, for 8 pages, the number of references is min 25 for research papers and 50 entries for review/study papers). Citations from textbooks should be used very rarely, and citations to web pages should be avoided. All cited papers should be referenced within the text of the manuscript.

3. Bukti konfirmasi review dan hasil review pertama (29 September 2023)

Prof. Dr. Eugene Yu-Dong Zhang ijai@iaesjournal.com via kirimdata.id   Sep 29, 2023, 8:59 PM

-- Please Strictly use the IJAI Template and Guide of Authors:
http://iaescore.com/gfa/ijai.docx
-- Research PAPER: minimum 25 references and Review PAPER: minimum 40 references
-- Please upload the revised paper within 6 weeks
-- Failing to do proper revision may lead to the rejection of your paper
===

Dear Prof/Dr/Mr/Mrs: Dr SINTHA WAHJUSAPUTRI,

We have reached a decision regarding your submission entitled "Artificial Intelligence-Based Learning Model to Improve the Talents of Higher Education Students Towards the Digitalization Era" to IAES International Journal of Artificial Intelligence (IJ-AI), a Scopus indexed journal (https://www.scopus.com/sourceid/21100901206). This journal is indexed by Scopus/Scimagojr, with a SJR of 0.341 (2020), Q2 under Electrical and Electronic Engineering, and Information Systems and Management categories.

Our decision is revisions required.
Please revise your manuscript according to the reviewers' comments. In a response letter that should be sent with your re-submission, you should talk about each of the reviewers' points. Please also adhere to every detail of the guide of the authors (MS Word: http://iaescore.com/gfa/ijai.docx, or LaTeX: http://iaescore.com/gfa/ijai.rar), and check it for spelling and grammatical mistakes. The goal of your revised paper is to present a polished paper that shows all of your new ideas and results (novel technical results) on the topic.

In preparing your final paper, you should pay attention to our guidelines:
– http://ijai.iaescore.com/index.php/IJAI/about/editorialPolicies#custom-3
– http://ijai.iaescore.com/index.php/IJAI/about/editorialPolicies#custom-5

Please submit your revised paper within eight (8) weeks.

I look forward to hearing from you.
Thank you

Best Regards,
Prof. Dr. Eugene Yu-Dong Zhang
University of Leicester
ijai@iaesjournal.com

The following template should be used for responses to reviewers:

I would like to thank the reviewers for their insightful feedback. All comments from Reviewer 1 are highlighted in yellow, those from Reviewer 2 are highlighted in red, and those from Reviewer 3 are highlighted in green.

Reviewer 1

Comment 1: There are some references that are not required.
Response: We thoroughly updated our references; 5 references were eliminated, and two were replaced by more recent publications.

Comment 2: The presentation of Figures 2 and 3 should be improved.
Response: The necessary adjustments have been made.

Comment 3: Equation (2) seems to be incorrect.
Response: Equation (2) is correct. This can be proven as follows:…
In order to clarify equation 9 in the manuscript, the following remarks have been added… etc.

All changes for reviewer 1 are highlighted in yellow in the main text.

4. Bukti konfirmasi submit revisi kedua, respon kepada reviewer, dan artikel yang diresubmit (9 Oktober 2023)

==

Our decision is to major revisions required

Please revise your manuscript according to the reviewers' comments. In a response letter that should be sent with your re-submission, you should talk about each of the reviewers' points. Please also adhere to every detail of the guide of the authors (MS Word: http://iaescore.com/gfa/ijai.docx, or LaTeX: http://iaescore.com/gfa/ijai.rar), and check it for spelling and grammatical mistakes. The goal of your revised paper is to present a polished paper that shows all of your new ideas and results (novel technical results) on the topic.

For ORIGINAL RESEARCH PAPER

There are four (4) types of novel technical results:
1) An algorithm;
2) A system construct: such as hardware design, software system, protocol, etc.; The main goal of your revised paper is to ensure that the next person who designs a system like yours doesn't make the same mistakes and takes advantage of some of your best solutions. So make sure that the hard problems (and their solutions) are discussed and the non-obvious mistakes (and how to avoid them) are discussed;
3) A performance evaluation: obtained through analyses, simulation or measurements; or
4) A theory: consisting of a collection of theorems.

Your final camera ready paper should focus on:
1) Describing the results in sufficient details to establish their validity;

2) Identifying the novel aspects of the results, i.e., what new knowledge is reported and what makes it non-obvious; and
3) Identifying the significance of the results: what improvements and impact do they suggest.
The Number of minimum references for the original research paper is 25 references (and minimum 20 recent journal articles).

For REVIEW PAPER

The paper should present a critical, constructive analysis of the literature in a specific field through summary, classification, analysis and comparison.
The function and goal of the review paper is: 1) to organize literature; 2) to evaluate literature; 3) to identify patterns and trends in the literature; 4) to synthesize literature; or 5) to identify research gaps and recommend new research areas.
The structure includes:
1. Title — in this case does not indicate that it is a review article.
2. Abstract — includes a description of subjects covered.
3. Introduction includes a description of context (paragraph 1-3), motivation for review (paragraph 4, sentence 1) and defines the focus

3. Introduction includes a description of context (paragraph 1-3), motivation for review (paragraph 4, sentence 1) and defines the focus (paragraph 4, sentences 2-3)
4. Body — structured by headings and subheadings
5. Conclusion — states the implications of the findings and an identifies possible new research fields
6. References ("Literature Review") — organised by number in the order they were cited in the text.
Number of minimum references for review paper is 50 references (and minimum 40 recently journal articles).

In preparing your revised paper, you should pay attention to that:
1. Please ensure that all references have been cited in your text. Use a tool such as EndNote, Mendeley, or Zotero for reference management and formatting, and choose IEEE style. Each citation should be written in the order of appearance in the text in square brackets. For example, the first citation [1], the second citation [2], and the third and fourth citations [3], [4]. When citing multiple sources at once, the preferred method is to list each number separately, in its own brackets, using a comma or dash between numbers, as such: [1], [3], [5]. It is not necessary to mention an author's name, pages used, or date of publication in the in-text citation. Instead, refer to the source with a number in a square bracket, e.g. [9], that will then correspond to the full citation in your reference list.
Examples of in-text citations:

We usually expect a minimum of 2n+9 references (for original research paper) and 4n+13 (for review/survey paper) primarily to journal articles, where n=page length of your papers (in simple words for 8 pages, number of references are min 25 for research papers, and 45 entries for review/study papers). Citations of textbooks should be used very rarely and citations to web pages should be avoided. All cited papers should be referenced within the text of the manuscript. If you need sources to enrich your references, please take a look at: https://ipmugo.com (but avoid self-citation/to cite the same journal)

2. Introduction section explains the context of the study and states the precise objective, and was presented within 3-7 paragraphs. Suggested structure of an introduction section is:
   a). Introductory paragraph (usually one or two paragraphs):
      – Give a general introduction to the topic for a broad audience
      – Narrow the focus to your particular topic
      – State your research problem and aims
   b). Literature review (usually several paragraphs):
      – Summarize the relevant literature on your topic
      – Describe the current state of the art
      – Note any gaps in the literature that your study will address
   c). Research targets (usually one paragraph):
      – Briefly describe how you will accomplish your aims
      – Give a preview and state the contribution of the work

3. Results and discussion section: The presentation of results should be simple and straightforward in style. You should improve your analyzing and also present the comparison between performance of your approach and other researchers. Results given in figures should not be repeated in tables. This section reports the most important findings. It is very important to prove that your manuscript has a significant value and not trivial.

Please submit your revised paper within 8 weeks.

I look forward for hearing from you

Thank you

Best Regards,
Prof. Dr. Eugene Yu-Dong Zhang
University of Leicester
ijai@iaesjournal.com

The following message is being delivered on behalf of IAES International Journal of Artificial Intelligence (IJ-AI).

_____

-- Paper ID# 23842
-- Please strictly adhere to the final checklist:
http://ijai.iaescore.com/index.php/IJAI/about/editorialPolicies#custom-5
-- Authors should include the research grant or contract number.
-- Submit your final paper along with a similarity report to email:
ijai@iaesjournal.com
===

Dear Prof/Dr/Mr/Mrs. Dr SINTHA WAHJUSAPUTRI,

It is my great pleasure to inform you that your paper entitled "Artificial Intelligence-Based Learning Model to Improve the Talents of Higher Education Students Towards the Digitalization Era" is initially ACCEPTED and will be published in the forthcoming issue of the IAES International Journal of Artificial Intelligence (IJ-AI), a Scopus indexed journal (see: https://www.scopus.com/sourceid/21100901206). Congratulations!!

Your paper will be published after fulfilling all requirements for publication (strictly follow the guidelines at http://ijai.iaescore.com/index.php/IJAI/about/editorialPolicies#custom-5). The presentation of the simulation and/or experimental setup (in the Method section) must be clear and complete in every detail facilitating reproducibility by other scientists. Present a picture of your simulation and/or experimental setup and describe your work clearly. For your information, according to international regulations, the similarity score of camera-ready paper should be less than 25%. A single author is NOT acceptable, and will never publish in this journal. The editor(s) will decide whether or not your camera-ready paper is complete and meets the final guidelines. Please present each reference as completely as possible while adhering to IEEE style (including volume, number, pages, and DOIs). Failing to make a proper revision may lead to the delay of your paper for publication, even may lead to the rejection of your paper.

Submit your documents below.
1. Final camera-ready paper (in MS Word or LATEX source files)
2. Report on similarity (via iThenticate or Turnitin)
3. Payment proof
within 30 days by replying to this email address (ijai@iaesjournal.com).

Authors should provide the research grant or contract number in the acknowledgement section. It should be noted that many funding agencies and research institutions require grant and fellowship acknowledgement. As a result, a funding acknowledgement statement should be included in the publication for all research studies. Whether the money was partial or full, any relevant grant numbers should be included.

When you send in all of the above documents and your final paper follows all of the final instructions, your paper will be judged "fully accepted." It will be the date of your paper's acceptance.

Your cooperation is very appreciated

Sincerely yours,
Prof. Dr. Eugene Yu-Dong Zhang
University of Leicester
ijai@iaesjournal.com

This journal is open access. Why publish open access? IAES open access authors benefit from the following: quality, established and reputable journal, reaching key audiences with 5 million users per month, high citations, etc. So, the open access fee is paid by the authors, or on their behalf, to support the cost of wide open access dissemination of research results; to pay deposit to CrossRef in order for each published article to have a Digital Object Identifier (DOI); to manage the various costs associated with handling and editing of the submitted manuscripts; and the journal management and publication in general.

In order to cover part of the publication cost, each accepted paper (collaboration between two or more authors) is charged USD 345. This charge is for the first 8 pages, and any published manuscript over 8 pages will incur extra charges of USD50 per page. A single author is prohibited. If Author Force is the sole author, the publication fee is double the normal fee (USD 690 for the first 8 pages, and if any published manuscript over 8 pages will incur extra charges of USD 100 per page).

11 Bukti konfirmasi submit revisi ketiga, respon kepada reviewer dan artikel yang akan dipublish (22 Mei 2024)

Dear Prof. Sintha Wahjusaputri *et al.*,

We apologize for the inconvenience, we have reviewed your revised paper but there are some things that need to be corrected. Please see the attached file (including comments and/or flagged sections) to take further action. Kindly submit your updated revision within 5 days by marking what has been revised. Please send the revised version by replying to all this email.

*Notes:
- Please make sure you submit the revised file according to the attached comments.
- Do not add anything that does not match the comments we have sent.

"Please note that this email is only assigned for layout and editing purposes. For other communication purposes, reach us through the principal contact of the journal."

Kind Regards,
Layout and Editing Team
Editorial Staff on behalf of Editor-in-Chief
