Dear Prof/Dr/Mr/Mrs: Dr SINTHA WAHJUSAPUTRI,

Thank you for submitting the manuscript, "Development of Artificial Intelligence-Based Teaching Factory in Vocational High Schools in Central Java Province" to Journal of Education and Learning (EduLearn), an open access and Scopus indexed journal. With the online journal management system that we are using, you will be able to track its progress through the editorial process by logging in to the journal web site:

Manuscript URL:
https://edulearn.intelektual.org/index.php/EduLearn/author/submission/21422
<-- It is your paper ID
Username: sintha_89

Before continuing for review process and for avoiding delay on review process, please re-upload your updated paper as "author version" in the same paper ID number within 10 days.
Attention Please!
1. Please try to adhere to the format as closely as possible. Please carefully read our most recent manuscript submission guidelines (https://iaescore.com/gfa/edulearn.docx).
2. Add the names of all authors, and please provide active or valid emails, as well as author identifiers and academic social network profiles, such as Google Scholar, ORCID, Scopus, and Web of Science ResearcherID (formerly Publons). You can also add your Academia.edu, ResearchGate, LinkedIn, Loop, and other profiles.
3. A high quality paper should has:
   a) a clear statement of the problem the paper is addressing;
   b) the proposed solution(s); and
   c) results achieved. It describes clearly what has been done before on the problem, and what is new. Please clearly state the three points listed above in your updated paper.
4. The number of minimum references for an original research paper is 25 (and at least 20 recently journal articles); and the number of minimum references for a review paper is 50 (and at least 40 recently journal articles).

At this stage, it is critical that you adhere to every detail of the IAES format. Otherwise, we will reject your paper.

Each citation should be written in the order of appearance in the text in
square brackets. For example, the first citation [1], the second citation
[2], and the third and fourth citations [3,4]. When citing multiple sources
at once, the preferred method is to list each number separately, in its own
brackets, using a comma or dash between numbers, as such: [1], [3], [5] or
[4-8]. It is not necessary to mention an author's name, pages used, or date
of publication in the in-text citation. Instead, refer to the source with a
number in a square bracket, e.g. [9], that will then correspond to the full
citation in your reference list. Examples of in-text citations:
    This theory was first put forward in 1970 [9]."
    Handayani [10] has argued that...
    Several recent studies [7], [9], [11-15] have suggested that....
    ...end of the line for my research [16].

- For an original research paper, there are four (4) sorts of innovative technical outcomes: 1) An method/technique/approach/framework/...; 2) A system construct, such as a hardware design, software system, protocol, and so on; The major purpose of your rewritten article is to guarantee that the next individual who builds a system similar to yours does not make the same mistakes and takes benefit of some of your better ideas. So make certain that the difficult problems (and their answers) are covered, as well as the non-obvious mistakes (and how to prevent them). 3) A performance evaluation: acquired by analysis, simulation, or measurements; or 4) A theory: a set of theorems. Your updated paper should emphasize: 1) Describing the results in sufficient detail to verify their validity; 2) Identifying the innovative parts of the results, i.e., what new information is revealed and what makes it non-obvious; and 3) Identifying the relevance of the results: what improvements and effect do they imply. A minimum of 25 references are required for an original research work (included 20 recent journal articles).

- For review paper, there should be a critical, constructive review of the literature in a certain topic via summary, categorization, analysis and comparison in this work. The purpose of a review article is one of five things: 1) to arrange literature; 2) to assess literature; 3) to find patterns and trends in literature; 4) to synthesize literature; or 5) to identify research gaps and offer new areas of investigation. The structure includes:
1. Title — in this case does not indicate that it is a review article.
2. Abstract — includes a description of subjects covered.
3. Introduction includes a description of context (paragraph 1–3), motivation for review (paragraph 4, sentence #1) and defines the focus (paragraph 4, sentences #2–3)
4. Body — structured by headings and subheadings
5. Conclusion — states the implications of the findings and an identifies possible new research fields
6. References ("Literature Review") — organised by number in the order they were cited in the text.
Number of minimum references for review paper is 50 references (and minimum 40 recently journal articles).

- Abstract: Prepare your abstract in one paragraph of no more than 200 words. You must summarize your contribution, hypothesis, findings/results, and discuss the consequences of your findings. There are no abbreviations, footnotes, or references. Without the use of mathematical equations, graphs, or tabular data. It is recommended that you offer your abstract using the following elements: 1) state the primary goal of the paper; 2) highlight the merits (or contribution; 3) provide a conceptual idea on the method; 4) describe the research design and procedures/processes used (is it simulation, experimental, survey, etc.); 5) provide the main outcomes or results, as well as any conclusions that may be drawn; and 6) include any implications for further research or application/practice, if any.

The following criteria should be carefully considered in your updated paper:
1. Analysis: Your rewritten article should exhibit a thorough comprehension of the major problems surrounding your chosen topic. The article should demonstrate analysis rather than a simple overview of the issue under examination. It should also offer proof to back its arguments if needed.
2. Connections: Throughout the research, your work should illustrate a relationship between the sources you include and the major issue.
3. Mechanics: This involves paying attention to punctuation, grammar, and spelling mistakes in your contributions.
4. Formatting: Follow the updated author's guide (http://iaescore.com/gfa/edulearn.docx).

(https://www.scopus.com/sourceid/21101162692). Congratulations!

However, we require your cooperation for minor revisions. Please ensure that
your paper is properly organized, as the readers of this journal include not
only local authors in your country but also international audiences. The
results are expected to be advantageous for global audiences. Authors should
write "research grant or contract" in the acknowledgement section. Please
prepare your final paper by doing your best to avoid any delay for
publication !!! Please do it seriously !!!

Submit all your documents below within 6 weeks:
1. Final paper (in MS Word file format)
2. Full similarity report (in PDF file format), along with
3. Payment evidence
to email: EduLearn@uad.ac.id cc: EduLearn@journal.uad.ac.id.

The similarity rate should be checked by using software such as iThenticate
or Turnitin (that the result is below 25%). If the similarity index is more
than 25%, your paper will be rescheduled for publication until the
similarity is less than 25%.

We really appreciate your total commitment to supporting this journal.

Your cooperation is very appreciated
