

PREFACE

The research reported in this monograph had two main objectives. The first objective was to assess the relevance, feasibility and practicality of modeling the spatial structure of a developing island economy using a new hybrid procedure to generate inter-regional input-output tables. The second objective was to apply the procedure to study the spatial structure of the island economy of Indonesia.

The first objective was achieved in four steps. Step 1: a review of the literature on hybrid techniques for constructing inter-regional input-output tables; Step 2: an examination of the regional characteristics of island economies and assessing their implications for developing a hybrid procedure; Step 3: a review of the current practices for generating of single-region and multi-region input-output tables in Indonesia; Step 4: an assessment of the potential of applying the hybrid technique for constructing inter-regional input-output tables in Indonesia. As a result a new hybrid procedure for generating inter-regional input-output tables (GIRIOT) for an island economy in a developing country has been developed. This procedure is the most significant contribution of the research.

GIRIOT combines and modifies the GRIT II and GRIT III procedures developed at The University of Queensland. At least three aspects of the new procedure are different to GRIT; the hybrid procedure designed for a mainland economy in a developed country. GRIT uses national technical coefficients. GIRIOT adjusts regional technology differences since in an island country like Indonesia; regional diversity exists in its ecology, economy and culture. GRIT uses LQ (Location Quotient) techniques. GIRIOT estimates the intra-regional input coefficients by employing the generalised RSP (Regional Supply Percentage) and uses column-only as well as row-only approaches. The two approaches are then reconciled. GIRIOT also estimates the inter-regional input coefficients using the inter-island transport pattern of commodity groups for primary and secondary sectors and the pattern of population distribution for the non-zero imports of service sectors.

Two other advantages of the GIRIOT procedure are important. First, it can provide the facilities for generating single-region input-output tables. Second, it can be expanded to generate inter-national input-output tables (GINIOT) if the appropriate data are available.

Inter-regional input-output tables were constructed for this research using 1990 data from Indonesia. Plausible validity testing showed that the GIRIOT procedure could produce inter-regional input-output tables that satisfactorily reflect the spatial characteristics of the

Indonesia economy, provided sufficient resources are available. The results also showed the stability of multipliers when all observed values of total multipliers for output, income and employment fell between the lower and upper boundary of the 95 per cent confident interval. Sensitivity analysis also showed that less than 15 per cent of direct coefficients are important for creating total output, income and employment multipliers.

Households proved to be the most critical sectors, confirming the suggestion that household sectors may be the most important feature of regional economies. The manufacturing sector in all regions was the next critical sectors for generating output, income and employment multipliers. Transport and communication sectors were crucial for Sumatera, Java and Kalimantan islands. Trade sectors in Sumatra, Java, Nusa Tenggara and Other Islands were also critical. The financial sector is critical only for the Sumatra and Java islands. Except for Kalimantan island, no agricultural sectors are identified as critical sectors.

The model proved useful for analyzing the spatial structure of the island economy of Indonesia as well as the impact of policy simulations. The results of the procedure are claimed to represent reality within acceptable professional norms.

This monograph offers five further contributions : (1) an evaluation of the current methods used to construct single-region and inter-regional input-output tables in Indonesia; (2) the development of an appropriate hybrid procedure to construct both single-region and inter-regional input-output tables for an island economy in a developing country; (3) an application of the inter-regional input-output model to analyse the spatial structure of Indonesia's island economy; (4) developmental methods of validating inter-regional input-output tables; and (5) an analysis of the sectoral, spatial and spatial-sector significance of an island economy.

Many individuals and institutions have been involved in the research reported in this monograph. Without their generosity and support, this work would never have reached its present form. I would like to offer my most sincere gratitude to whom I am indebted but whose name are not mention here.

I would also like to extend my deapest appreciation to two governments : the Government of Indonesia, especially for the Agency for Assessment and Application of Technology; and tge Government of Australia and Aus-AID. These institutions gave me the opportunity for further study in Australia. Their generosity has enable myself and my family to stay in Brisbane during the years of study at The University of Queensland.

At the Agency for assessment and Application of Technology, I wish to acknowledge the help and support of Drs. Komarudin, MA, Deputy Chairman for System Analysis; Ir. Iding Chaidir MSc, Director for System Assessment of Primary Industri; Ir, Ardito M. Kodidjat, MArch, Head of the Center for Training and Education. At AusAID Jakarta, my thanks go to Mrs. Shiela Soebroto. At AusAID's Queensland Office my particular thanks to Mrs. Elizabeth Firth, my Training Liaison Officer for the first three years. Mrs. Firth is now the Manager of the International Education Office at The University of Queensland and to Ms. Gloria Newton and Ms. Fiona Pakoa during the rest of my study.

At the University of Queensland I acknowledge the help and support of Ms. Marie Morrison, International Student Support and Mrs. Ruwena Lawson, Administration Officer at the Department of Economics.

I convey my most sincere gratitude to Profesor Rodney C. Jensen, my associate supervisor. Prof. Jensen awakened my interest in the field of regional science during my Postgraduate Diploma in Regional Development at The University of Queensland. His great care and patience, suggestion, support and encouragement during the entire process of preparing the thesis have been constant and invaluable. I am indeed indebted to Dr. Guy R. West who served as my principal supervisor. I thank him for his warm advice and suggestions, his support and encouragement, patience and friendship.

The members of the small Indonesian community at St. Lucia provided me with a supportive caring environment. I appreciate especially the families of Iman Partoredjo, Djadjang Sudradjat, Rusydi Syahra, Mirzawan Nurcahyo, Hardinsyah, Sudirman, Hartono, Arifin Bhakti, Taufik Fauzi, Bagoes Purmajaya, Wijayono Sarosa, M. Handry Imansyah, Tajudin Banticut and Budi Indarsih and Agustina Rahmiana (Anna). Anto and Habib receive special thanks for sharing their computer expertise with me.

My parents, parents in-law, brothers, sisters and relatives in Indonesia have given me steady long-distance support and their prays. My sincere thanks to them, particularly Ibu dan Bapak H. Muhamid Syarun, Ibu dan Bapak H. Maad Zaenuri, the family of H. Zaini Ismail and the Bahroin family.

These acknowledgements would not be complete without expressing my very special gratitude to Mrs. Margareth Holm for editing the draft of the thesis. Vitalie Rotaru at Lambert Academic Publishing for providing me the opportunity to publish this monograph. Prof. Dr. H. Suyatno, MPd, Dr. H. Pudjo Sumedi AS, MEd, Dr. Gunawan Suryoputro, MHum and Dr.

Zamah Sari, MA for giving me a very convenient and friendly environment at Muhammadiyah University of Prof. Dr. HAMKA in finalising the manuscript of this monograph.

Finally, my sincere thanks to my wife, Yati, son, Indra, daughter Annissa and grandson Marva. I cannot honestly say that they always facilitated the completion of my study and finalise this manuscript, but life would have been far less happy and far less rich without their presence.

TABLE of CONTENTS

Preface	i	
Table of Contents	v	
List of Tables	ix	
List of Figures	xiii	
List of Appendices	xv	
Chapter 1.	INTRODUCTION	
	1.1. Background	1
	1.2. The Need for an Inter-regional Input-Output Model	3
	1.3. The Problems	5
	1.4. Objectives and Scopes	6
	1.5. Significant Contributions	7
	1.6. Organisation of the Monograph	8
Chapter 2.	INPUT-OUTPUT MODELS WITH SPATIAL DIMENSIONS : BASIC CONCEPTS OF INTER-REGIONAL INPUT-OUTPUT MODEL	
	2.1. Introduction	11
	2.2. National Model	11
	2.3. Single-Region Model	14
	2.4. Intra-National Model	17
	2.5. Inter-Regional Model	20
	2.6. Multi-Regional Model	24
	2.7. Summary	26
Chapter 3.	METHODOLOGIES FOR CONSTRUCTING HYBRID INTER- REGIONAL INPUT-OUTPUT TABLES	
	3.1. Introduction	29
	3.2. Hybrid Techniques for Constructing Regional Input-Output Tables	30
	3.3. Hybrid Techniques for Constructing Inter-regional Input-Output Tables	36
	3.4. Non-Survey Methods in Hybrid Techniques	39
	3.5. Importance of Superior Data in Hybrid Techniques	62
	3.6. Summary and Assessment	64
Chapter 4.	INDONESIA: A GENERAL OVERVIEW OF AN ISLAND ECONOMY IN A DEVELOPING COUNTRY	
	4.1. Introduction	67
	4.2. Location, Climate and Natural Resources	67
	4.3. Population and Its Distribution	69
	4.4. Administration Divisions	70
	4.5. National Economy	71
	4.6. Regional Diversity	73
	4.7. Regional Variations in Technical Structure	75
	4.8. Inter-regional Trade Patterns	78
	4.9. Summary	83

Chapter 5.	CONSTRUCTING REGIONAL AND INTER-REGIONAL INPUT-OUTPUT TABLES IN INDONESIA	
	5.1. Introduction	85
	5.2. History of Input-Output Studies in Indonesia	85
	5.3. Constructing Single-Region Input-Output Tables	88
	5.4. Constructing Many-Region Input-Output Tables	92
	5.5. Potential Application of Hybrid Techniques in Indonesia	96
	5.6. Summary	98
Chapter 6.	A NEW HYBRID PROCEDURE FOR GENERATION OF INTER-REGIONAL INPUT-OUTPUT TABLES (GIRIOT) FOR AN ISLAND ECONOMY	
	6.1. Introduction	99
	6.2. Basic Considerations of the GIRIOT Procedure	99
	6.3. The GIRIOT Procedure	100
	6.4. Justification of the GIRIOT Procedure	112
	6.5. Summary	114
Chapter 7.	MODELLING THE SPATIAL STRUCTURE OF AN ISLAND ECONOMY: AN APPLICATION OF THE GIRIOT PROCEDURE FOR INDONESIA	
	7.1. Introduction	117
	7.2. Regional Definitions and Sectoral Classifications	117
	7.3. Empirical Application of the GIRIOT Procedure	122
	7.4. Validity of the Model	133
	7.5. Problems and Prospects of the GIRIOT Procedure	142
	7.6. Summary	145
Chapter 8.	THE SPATIAL STRUCTURE OF THE ISLAND ECONOMY OF INDONESIA: A DESCRIPTIVE ANALYSIS	
	8.1. Introduction	147
	8.2. Domestic Production Account and Gross National Product	147
	8.3. Output Allocation and Structure of Inputs	149
	8.4. Spatial Distribution of Gross-Output, Value-added, Household Income, Employment, Exports and Imports	151
	8.5. Sectoral Distribution of Gross-Output, Value-added, Household Income, Employment, Exports and Imports	156
	8.6. Spatial-Sectoral Distribution of Gross-Output, Value-added, Household Income, Employment, Exports and Imports	166
	8.7. Summary	168
Chapter 9.	THE SPATIAL STRUCTURE OF THE ISLAND ECONOMY OF INDONESIA: THE MULTIPLIERS, FLOW-ON EFFECTS AND SPATIAL LINKAGES ANALYSIS	
	9.1. Introduction	171
	9.2. The Multipliers	171
	9.3. The Flow-on Effects	179
	9.4. The Spatial Linkages : Feed-back and Spill-over Effects	187
	9.5. Summary	196

Chapter 10.	THE SECTOR AND SPATIAL SIGNIFICANCE IN THE INDONESIAN ECONOMY AND THEIR POLICY IMPLICATIONS : THE MANUFACTURING INDUSTRY AND THE ISLAND OF JAVA	
10.1.	Introduction	199
10.2.	Economic Significance of the Manufacturing Industry	200
10.3.	Java's Economic Significance	206
10.4.	Economic Significance of Java's Manufacturing Industry	209
10.5.	Policy Implications of the Spatial Structure of the Indonesian Economy	213
10.6.	Summary	220
Chapter 11.	CONCLUDING REMARKS	
	Introduction	223
	Summary	223
	Conclusion	230
	REFERENCES	233
