D. General/specific comments from Reviewer

There is no discussion section.

E. Decision recommendation (Choose one with a mark X)

Choice	Decision
ACCEPTED <i>With or only a slight improvement suggested by the reviewer and editor.</i> Score 51 - 60	
ACCEPTED WITH SOME CORRECTIONS <i>With a few changes to be done by the author.</i> Score 36 -50	
RETURNED TO THE AUTHORS FOR AN URGENT MODIFICATION <i>The author is required to improve it and give it back to the next revision process.</i> Score 26 - 35	
REJECTED Score 14 - 25	

- **ACCEPTED:** If the paper has been able to convince the Journal institution on predetermined criteria, especially in terms of the Peer Review process for a decent script issue.
- **ACCEPTED WITH SOME CORRECTIONS:** If the script needs some improvements before it is decided to be accepted by exposing some of the comments on the paper by the reviewer. So, in this case the reviewer gives a running commentary more detail about the improvements that need to be done by the script writer (paper will be returned to the author for light improvement).
