Reviewer B:

Bismillah and Assalam.

Reviewer A:

Firstly thank you for the very good article

very clear and straight forward title, clear objectives and methodology.

Adequate briefing in the introduction, well presented results and nice discussion according to objectives given.

my comments going to be few,

1. Some abbreviation is not well understood internationally. eg: RDA, UMR unless i'm not very familiar with it.
2. Some typing errors eg: BeforeCovid-19 should have a space before/Covid-19 and inconsistent spacing in most of the ">" when used. another one googleform should be having spacing
3. Maybe can check on spelling Covid-19 on last paragraph in the introduction... small letter for the letter "C" is used
4. All big capital **COVID**-19 also being used in results... 2nd paragraph

Recommendation: Revisions Required

Reviewer B:

Bismillah and Assalam.

Such a good paper, just right on time to discuss about food security during this time around. Congratulation.

1. Firstly, structural and flow are good and up to the standard.
2. From the manuscript the most glaring to my eyes is too many punctuation marks mistakes (full stop, commas, small letter for town's name etc).
3. I may suggest if p value can be written as p=0.001 or p=.001 instead of p=0.000
4. Objectives are well stated and all answered towards the end.
5. In Methodology, for me the sampling method is not well mention, I may consider it is universal sampling or purposive sampling because those who ever willing to answer the questionnaires via phone is enrolled.
6. May consider to make some correction on table 1. Under variable Mother age. <25, 26-35, 36-45 age group were selected which those who are at 25 years old is not included.
7. In table 3 under CI95%, result can be written as -15.495, -14.431 instead of -15.495 - (-)14.431.
8. Some abbreviation is not mention anywhere in the study, example UMR, PSBB...
9. Statistical and analysis are also appropriate and interpreted well in the study.
10. Discussion is adequate and conclusion is clearly made according to study objective.

Other than that, I find it is okay.

Thank you very much.
