Follow Up Workshop on Nutrition and School Meal

Background

The Sustainable Development Goals (SDGs) aims to emphasises the elimination of hunger, the achievement of food security, and the improvement of good nutrition for all people. To achieve this goals, Government of Indonesia started to implement Free Nutritious Meal Program to support a healthy, productive and competitive future young generation. In relation to supporting the implementation of the Free Nutritious Meal Programme, JICA provide a course that participants from government delegates can be a benchmarking of the implementation of School Meal and Shokuiku in Japan.

JICA's Global Agenda for Improving Nutrition aims to contribute to "solving the problem of malnutrition in all its forms, which is a growing concern internationally". In line with this, the Country Focus Training (CFT) was conducted in Tokyo and Nagasaki, Japan in September 2024. The Workshop on Nutrition and School Meal, planned to be conducted on 30 January 2025, is a direct follow up to this program.

Purpose

The workshop purpose is as follows:

1. To share the progress and the review on the Plan of Action
2. To learn from other participants in different institutions on cases to reflect the Plan of Action
3. To discuss with other participants on how to solve challenges and obstacles on their implementation in order to find the solution and contribution that might be possible to support the POA and the implementation of the Free Nutritious Meal Program
